1. Overview

Product: Sukhmal Dry Fruits Korner — a premium D2C e-commerce website selling dry fruits, nuts, seeds, dates, berries, and curated gift hampers, with a strong festival and wedding-gifting focus.

Business model: Direct online sales (retail) + gift hamper customization + bulk/corporate gifting orders.

Primary goal: Build a pixel-accurate, secure, production-ready frontend and backend from the attached UI Screens, matching the provided design exactly — no visual reinterpretation.

Target users: - End customers buying dry fruits/nuts for personal consumption - Gift buyers (festivals, weddings, birthdays, corporate gifting) - Repeat/loyalty customers with saved addresses and order history - Store admin (product, order, and inventory management — separate access level)

2. Scope of Pages

#	Page	Type
1	Homepage	Public
2	Product Listing Page (category + filters)	Public
3	Product Detail Page	Public
4	Gift Hampers Listing	Public
5	Gift Hamper Detail	Public
6	Wedding Gifts Landing Page	Public
7	Festival Collections (Diwali/Rakhi/Eid/Christmas/New Year)	Public
8	Build Your Own Hamper (6-step flow)	Public → Auth on checkout
9	Wishlist	Auth
10	Shopping Cart	Public/Auth
11	Checkout	Auth
12	Order Success	Auth
13	Track Order	Public (Order ID lookup)
14	About Us	Public
15	Contact Us	Public
16	My Account — Dashboard	Auth

17	My Account — My Orders / Order Detail	Auth
18	My Account — Order History	Auth
19	My Account — Saved Addresses	Auth
20	My Account — Profile Settings	Auth
21	Login / Sign Up	Public
22	Admin Panel (products, orders, inventory)	Admin only — separate route

3. Global Elements (present on every page)

- **Top utility bar:** Free delivery threshold, 100% Natural, Premium Quality, Handpicked with Care badges; right side — AI Assistant, Track Order, Store Locator, Login/Sign Up, Cart icon with live count
- **Header:** Logo + brand name/tagline, global search bar (dry fruits, nuts, gift hampers), Wishlist icon, “Build Your Own Hamper” CTA button, Cart icon with item count
- **Primary nav:** Shop by Category (mega-menu), Dry Fruits, Nuts, Seeds, Dates, Berries, Gift Hampers, Wedding Gifts (badged “New”), Corporate Gifts, Offers (badged “%”)
- **Footer:** Newsletter subscribe, Shop links, Customer Service links, My Account links, About Us links, payment method icons (Visa/Mastercard/RuPay/UPI), SSL/secure payment trust badges, social icons
- **Floating WhatsApp chat button** (bottom-right, persistent across pages)
- **AI Assistant** — chat widget for gift recommendations (“Gift Advisor Assistant”) and AI-generated hamper visual preview (“AI Image Generation” — describe a hamper in text, get a generated preview image)

4. Page-Level Functional Requirements

4.1 Homepage

- Hero carousel with video/image, dual CTA (Explore Gift Hampers / Build Your Own Hamper)
- Trust strip: 100% Natural, Handpicked, Premium Packaging, Express Delivery
- Shop by Category horizontal scroller (6 categories, arrows to scroll)
- Festival Collections horizontal scroller
- Best Sellers grid with quick “Add to Cart,” wishlist heart icon, star ratings, price
- “Make Every Gift Extra Special” — Build Your Own Hamper banner
- AI Image Generation panel — text prompt → generated hamper preview
- Gift Advisor Assistant chat panel
- Why Choose Us feature grid
- Wedding Gifts / Corporate Gifting promo blocks
- Customer testimonials carousel with photo, name, rating, verified buyer badge
- Instagram feed grid (linked to @handle)
- Newsletter signup

4.2 Product Listing Page

- Left sidebar filters: Category (with count), Price Range slider, Weight (250g/500g/1kg/2kg/5kg+), Speciality checkboxes (Natural, Premium, No Preservatives, Handpicked)
- Sort dropdown (Popularity, Price, Rating, Newest)
- Product grid cards: image, name, variant, weight-selector chips, star rating + review count, price (“Onwards”), quick add (+) button, wishlist heart
- Pagination / “Showing X of Y products”
- Corporate gifting promo card in sidebar

4.3 Product Detail Page

- Image gallery with thumbnail strip + zoom
- Breadcrumb, bestseller badge, rating, review count, “Sold by” verified badge
- Price with strike-through MRP + discount %
- Weight selector chips, quantity stepper
- Add to Cart (primary), Wishlist (secondary), Add Gift Message (expandable)
- Pincode delivery checker
- “Quick Order on WhatsApp” CTA
- Trust icon row (Natural/Premium/Handpicked/Delivery/Secure Packaging)
- Tabbed content: Description, Nutritional Info (table), Ingredients, Benefits, Storage Instructions, Reviews, FAQs
- Rating breakdown bar chart + individual reviews with verified buyer tag
- “You May Also Like” carousel

4.4 Gift Hampers Listing + Detail

-
- Category chips (All/Birthday/Wedding/Corporate/Festival/Luxury), budget-range quick filters
 - Hamper cards with tier badge (Premium/Deluxe/Luxury), weight, price
 - Detail page: “What’s Inside” itemized list with per-item weight, personalized message field, delivery date picker, product details bullets

4.5 Wedding Gifts Landing Page

- Hero video/image with CTA
- “Why Sukhmal Wedding Gifts” 5-point trust grid
- Bulk order request form: name, phone, email, occasion type, expected quantity, additional requirements — submits as a lead, plus WhatsApp/Instagram DM shortcuts

4.6 Festival Collections

- One promo block per festival (Diwali/Rakhi/Eid/Christmas/New Year) with themed copy + linked hamper product row per festival (4 products each, “View All” link)

4.7 Build Your Own Hamper (6-step wizard)

1. **Budget** — slider + preset chips (₹1,000–₹15,000+), shows “approx X products in this range”
 2. **Hamper** — choose container style (Basket/Box/Wooden Crate/Round Box) with price shown per style
 3. **Products** — category-tabbed product grid, add/remove with live running total; persistent right-side summary panel (Budget / Spent / Remaining / Products Added list with per-item qty and remove)
 4. **Gift Card** — pick a card design template, personalize message (150-char counter), optional recipient name, live card preview
 5. **Preview** — full hamper image + summary, “Redesign Hamper” / “Create Another Hamper” / “Confirm & Proceed” (loading state with progress %)
 6. **Complete** — confirmation
- Sidebar summary panel persists and updates live across steps 2-5

4.8 Wishlist

- Grid of saved items with weight-selector, “Move to Cart,” “Remove,” “Move All to Cart” bulk action

4.9 Cart

- Line items: image, name/variant, unit price, qty stepper, remove, line total
- Coupon code field
- Order summary: subtotal, discount, GST (5%), shipping (free-shipping threshold messaging), total
- “Proceed to Checkout”

4.10 Checkout

- Step indicator (Cart → Checkout → Payment → Confirmation)
- Saved address selection (radio cards) + “Add New Address”
- Delivery date picker (Today/Tomorrow/Custom)
- Optional gift-recipient fields (name, mobile, message with char counter) — for send-as-gift orders
- Payment method selection: UPI, Credit/Debit Card, Net Banking, Wallets, Cash on Delivery
- Order summary sidebar (sticky), “Place Order Securely”

4.11 Order Success

- Confirmation animation/illustration, Order ID, payment status, estimated delivery window
- Order summary recap, “Track Your Order” / “Continue Shopping” CTAs
- Cross-sell carousel

4.12 Track Order

- Order ID lookup field
- Order info summary (ID, date, recipient, payment status, amount)
- Shipment progress stepper (Confirmed → Packed → Shipped → Out for Delivery → Delivered)
- Tracking updates timeline (timestamped), delivery partner details with tracking number and support contact
- Fully responsive — desktop and mobile layouts both required (see mobile variant in supplied screens)

4.13 About Us

- Brand story, founder note (with quote), company timeline (2010–2025 milestones), manufacturing process steps, certifications (FSSAI, ISO, HACCP, GMP — display as badges), stats counter (years, customers, corporate clients,

products, satisfaction %), team grid

4.14 Contact Us

- Contact channel cards: Visit Store, Call, WhatsApp, Email
- Contact form: first/last name, email, phone, subject, query-type dropdown, order ID (optional), message, privacy-policy consent checkbox
- Store map embed + address/hours/parking info + “Get Directions”
- Bulk order CTA block (mirrors Wedding page)
- FAQ accordion

4.15 My Account

- **Dashboard:** profile summary, order/wishlist/address counters with links, recent orders, quick actions
 - **My Orders:** filterable list (All/Processing/Shipped/Delivered/Cancelled), order detail panel with items, delivery address, order summary, tracking timeline, invoice download, reorder action
 - **Saved Addresses:** card list with edit/delete, “Add New Address”
 - **Profile Settings:** personal info form, change password form, notification preferences (email/SMS/WhatsApp toggles), delete-account option
-

5. Authentication & Roles

- **Customer auth:** Firebase Authentication (email/phone + password, or OTP) — required for Checkout, Wishlist persistence, My Account, Order History
 - **Guest flow:** browsing, cart, product/hamper viewing allowed without login; login required only at checkout
 - **Admin role:** separate Firebase custom claim (`role: admin`), separate protected route namespace, own login — never exposed on the customer-facing UI
 - Full auth boundary rules to follow the separately supplied **SecurityArchitecture** document — this PRD defines *what* needs protecting, not the security implementation itself
-

6. Third-Party Integrations Required

Integration	Purpose
-------------	---------

Firebase Authentication	Customer + Admin login
Payment Gateway (Razorpay/Stripe — hosted checkout)	UPI, Card, Net Banking, Wallets
AI Assistant / Chat API	Gift Advisor Assistant widget
AI Image Generation API	“Generate hamper preview from text description” homepage feature
WhatsApp Business (click-to-chat link)	Support + Quick Order
Maps embed	Store Locator / Contact Us map
Delivery partner tracking (Blue Dart shown in mockup — placeholder, confirm actual courier API)	Track Order live status

Exact API contracts for the above are covered in the separately supplied **API Documentation** document — do not invent endpoints; wait for that spec before wiring these features.

7. Non-Functional Requirements

- Fully responsive: desktop, tablet, mobile (mobile variant explicitly supplied for Track Order — apply same responsive discipline sitewide)
- Page load performance: lazy-load below-the-fold images and carousels
- SEO-friendly URLs and meta tags per product/category/hamper page
- All forms client + server-side validated
- WCAG-reasonable accessibility (alt text, contrast, keyboard nav) — not a redesign excuse, keep within supplied visual design
- Currency: INR (₹), GST-inclusive pricing shown at cart/checkout

8. Out of Scope (v1)

- Native mobile app
- Multi-language/localization
- Subscription/recurring orders
- International shipping/checkout (domestic India only, per “Across India” delivery messaging in designs)

9. Design Fidelity Instruction (for the build agent)

All 23 supplied UI Screens are final, approved, high-fidelity designs. Match them exactly — layout, spacing, typography, color, iconography, component states, and copy. Do not substitute default styling, do not “improve” or reinterpret the design. Refer to the separately supplied **DesignSystem** document for exact tokens (colors, fonts, spacing scale). Where a screen shows a specific interaction (e.g., live-updating hamper summary, char-count fields, progress percentage on preview), implement that exact behavior — not an approximation.
