1. Complete Page Hierarchy

1.1 Shopping & Discovery

#	Page	Parent	URL Slug	Access
1	Homepage	— (root)	/	Public
2	Search Results	Header search bar	/search?q=	Public
3	Product Listing Page	Homepage / Nav	/category/:slug	Public

	(category)			
4	Product Detail Page	Product Listing Page	/product/:slug	Public
5	Gift Hampers Listing	Homepage / Nav	/gift-hampers	Public
6	Gift Hamper Detail	Gift Hampers Listing	/gift-hampers/:slug	Public
7	Wedding Gifts Landing	Nav	/wedding-gifts	Public
8	Corporate Gifts Landing	Nav	/corporate-gifts	Public
9	Festival Collections	Homepage / Nav	/festival-collections	Public
10	Offers / Deals Page	Nav	/offers	Public

1.2 Build Your Own Hamper (linear wizard)

#	Page	Parent	URL Slug	Access
11	Step 1 — Budget	Homepage / Nav	/build-hamper/budget	Public
12	Step 2 — Hamper Style	Step 1	/build-hamper/hamper	Public
13	Step 3 — Products	Step 2	/build-hamper/products	Public
14	Step 4 — Gift Card	Step 3	/build-hamper/gift-card	Public
15	Step 5 — Preview	Step 4	/build-hamper/preview	Public
16	Step 6 — Confirm	Step 5	/build-hamper/confirm	Auth (at payment)

1.3 Cart, Checkout & Orders

#	Page	Parent	URL Slug	Access
17	Shopping Cart (incl. empty-cart state)	Header cart icon	/cart	Public
18	Checkout	Cart	/checkout	Auth
19	Order Success	Checkout	/order-success/:orderId	Auth
20	Order Failed / Payment Retry	Checkout	/order-failed/:orderId	Auth
21	Track Order	Header + Order Success	/track-order	Public (Order ID lookup)
22	Return / Cancel Request	Order Detail	/account/orders/:orderId/return	Auth

1.4 Auth

#	Page	Parent	URL Slug	Access
23	Login	Header	/login	Public
24	Sign Up	Login	/signup	Public
25	Forgot Password	Login	/forgot-password	Public
26	OTP Verification	Login / Signup	/verify-otp	Public

1.5 My Account

#	Page	Parent	URL Slug	Access
27	Dashboard	Header (post-login)	/account	Auth
28	Wishlist	Header + Account	/wishlist	Auth

29	My Orders	Account	/account/orders	Auth
30	Order Detail	My Orders	/account/orders/:orderId	Auth
31	Order History	Account	/account/order-history	Auth
32	Saved Addresses	Account	/account/addresses	Auth
33	Payment Methods	Account	/account/payment-methods	Auth
34	Loyalty Points	Account	/account/loyalty	Auth
35	Profile Settings	Account	/account/settings	Auth

1.6 Content & Trust Pages

#	Page	Parent	URL Slug	Access
36	About Us	Footer / Nav	/about-us	Public
37	Contact Us	Footer / Nav	/contact-us	Public
38	Store Locator	Header + Footer	/store-locator	Public
39	Blog (listing + article)	Footer	/blog, /blog/:slug	Public
40	Careers	Footer	/careers	Public
41	FAQs	Footer + Contact Us	/faqs	Public
42	Shipping & Delivery Policy	Footer	/shipping-delivery	Public
43	Returns & Refunds Policy	Footer	/returns-refunds	Public
44	Privacy Policy	Footer	/privacy-policy	Public
45	Terms & Conditions	Footer	/terms-conditions	Public
46	404 Not Found	Any broken link	/404	Public

1.7 Admin (separate protected namespace)

#	Page	Parent	URL Slug	Access
47	Admin Dashboard	—	/admin	Admin only
48	Products Management	Admin Dashboard	/admin/products	Admin only
49	Orders Management	Admin Dashboard	/admin/orders	Admin only
50	Inventory Management	Admin Dashboard	/admin/inventory	Admin only
51	Customers	Admin Dashboard	/admin/customers	Admin only
52	Coupons / Offers Management	Admin Dashboard	/admin/offers	Admin only

2. Desktop Navigation

Header: Logo → Search bar → Wishlist icon → Build Your Own Hamper CTA → Cart icon (count badge) **Primary nav bar:** Shop by Category (mega-menu) · Dry Fruits · Nuts · Seeds · Dates · Berries · Gift Hampers · Wedding Gifts (New) · Corporate Gifts · Offers (%) **Footer (4 columns + payment/trust row):** Shop · Customer Service · My Account · About Us — plus newsletter signup and payment/security badges

3. Mobile Responsive Structure

The design screens already show a working mobile layout for Track Order — apply the same responsive pattern sitewide. Standard mobile e-commerce conventions to follow:

3.1 Mobile Header (collapsed)

- Hamburger icon — opens slide-in drawer with full category list + account/wishlist/track order links (replaces desktop mega-menu)
- Center: logo (icon-only or compact wordmark)
- Right: search icon (expands to full-width search overlay on tap), cart icon with count

3.2 Mobile Bottom Tab Bar (persistent, fixed)

Standard for shopping apps — improves conversion vs. relying on header alone:

Tab	Links to
Home	Homepage
Categories	Category drawer / Product Listing
Build Hamper	Build Your Own Hamper Step 1
Cart	Cart (with live badge count)
Account	Account Dashboard (or Login if guest)

3.3 Mobile-Specific Behavior Changes

- **Filters (Product Listing Page):** desktop sidebar becomes a mobile bottom sheet/drawer triggered by a “Filter” button, not permanently visible
- **Product grid:** 2 columns on mobile vs. 3 on desktop
- **Build Your Own Hamper step indicator:** desktop horizontal stepper becomes mobile compact “Step 3 of 6” text plus a progress bar (avoid cramming 6 circles on small width)
- **Checkout order summary:** desktop sticky sidebar becomes a mobile collapsible summary bar pinned above the “Place Order” button
- **Image galleries (PDP):** desktop thumbnail strip beside the image becomes a mobile swipeable carousel with dot indicators below the image
- **Tables (Nutritional Info, etc.):** must remain horizontally scrollable or stack into label-value pairs — never overflow/break layout
- **WhatsApp floating button:** repositions to avoid overlapping the bottom tab bar

3.4 Breakpoints (standard, confirm final values against DesignSystem doc)

Breakpoint	Width	Layout
		Single column, bottom tab

Mobile	below 640px	bar, hamburger nav
Tablet	640-1024px	2-column grids, condensed header, no bottom tab bar
Desktop	above 1024px	Full layout as per supplied UI Screens

4. Cross-Page Link Map (key flows)

From	To
Homepage → Best Sellers card	Product Detail Page
Homepage → “Build Your Own Hamper” CTA	Build Hamper Step 1
Homepage → “Explore Gift Hampers”	Gift Hampers Listing
Header search → results	Search Results Page
Product Listing → product card	Product Detail Page
Product Detail → “Add to Cart”	Cart updates (stays on page, confirmation toast)
Product Detail → “You May Also Like” card	Another Product Detail Page
Cart (empty state) → “Continue Shopping”	Homepage or last-viewed category
Cart → “Proceed to Checkout”	Checkout (redirects to Login if guest)
Checkout → “Place Order Securely”	Order Success (or Order Failed on payment error)
Order Success → “Track Your Order”	Track Order (pre-filled Order ID)
My Orders → order row → Track / Reorder / Return	Track Order / Cart / Return Request
Wishlist → “Move to Cart”	Cart
Any page → WhatsApp floating button	External WhatsApp chat
Footer policy links	Respective static content page

5. Notes for Build Agent

- Build Your Own Hamper is a **linear wizard** — Steps 2-6 must redirect to Step 1 if session/budget state is missing; no direct URL skipping.
- Track Order is intentionally **public** — only an Order ID is required, since gift recipients (not just the buyer) may track a delivery.
- Admin routes (`/admin/*`) sit in a fully separate protected namespace — never linked from customer-facing nav or footer. See the SecurityArchitecture document for access-control rules.
- Checkout requires authentication; Cart does not — guest users can add to cart and are prompted to log in only at “Proceed to Checkout.”
- Mobile is **not a scaled-down desktop** — the bottom tab bar, filter bottom-sheets, and carousel patterns above are structural changes, not just responsive CSS resizing. Build mobile layouts as first-class, not an afterthought.
